To Whom It May Concern:

Re: Business Safety Systems.

Three years ago Wolverhampton Wanderers FC carried out a review of their non matchday health and safety arrangements.

It soon became obvious that whilst many areas were compliant there was very little to demonstrate this practically, the documentation needed pulling together and systems needed to be developed, monitored and assessed properly.

Business Safety Systems had the ideal solution, so the club signed up to take advantage of their excellent consultancy and impressive 'Target 100' system.

This system had the answer to our problems, it is helping us to develop our systems and procedures in a manner that is clear, we now have the ability to assess our overall progress in a couple of clicks.

The system contains many templates and checklists that can be used or adapted to suit the needs of a business, there is also a wealth of information in the background information section that gives up to date, easy to understand, guidance on numerous issues and regulations.

We have developed an excellent working relationship with the company and the team, they and their system has impressed leaving us secure in the knowledge that our progress towards compliance is 'in safe hands'.

We would have no hesitation in recommending Business Safety Systems to any potential client.

Yours sincerely

Stephen Sutton
Stadium & Safety Manager
Wolverhampton Wanderers F.C
